Adrenasense

he reminded me about the critical need for organ donors: there are about 72,000 patients awaiting transplants and only 12,000 donors per year.

a drug or drugs can be administered to an individual by oral administration of a mixed lipid-bicarbonate composition of the present invention in which the drug (or drugs) is incorporated

these include common sense environmental ones, such as keeping the dense vegetation down, and maintaining a natural "tick" barrier with wood chips
