care to terminally ill people and their families, to allow them to make the most of the precious time

the average interval from the commencement of induction to delivery was 1,194.1 - 568.7 mins for mifepristone-treated subjects and 770.8 - 519.9 mins for ot-treated subjects (p  0.001)

bob henry's group at uc san diego and the san diego va studies this issue

nowhere was this internal orientation more obvious than in pricing

i know this is entirely off topic but i had to share it with someone
