mark, is a long (3-5 mi) slow "run" 3-4 times a week chronic cardio?

why? nothing in her care-plan has changed

to the heart either through the femoral artery (groin) or through a small incision just above the breast

accord in 2015 to combat global warming
given the antiregulatory mood of congress these days, to say nothing of efforts to dismantle environmental protection laws and agencies, it seems a touch unlikely that the proposal will fly
